Find your way out of the jungle

**TI-99/4A program**  
Gold rush fever

**Plus:**  
lots of news, letters, charts, U.S. Scene ...

## The BASIC problem

Working with a computer at school isn't always an advantage if you're going on to study computing at college, according to a professor of cybernetics at Reading University. In some cases it can be a drawback — slapdash habits picked up when programming in BASIC will have to be unlearned before students can achieve anything of real difficulty.

Professor Peter Fellgett recently aired his views in a letter to the Daily Telegraph. "It was a real cri de coeur," he

*Continued on page 5*

## Labour on-line

The Labour Party has started its own scheme to take full advantage of the facilities available on Micronet 800. The scheme will set up a 100-page area on the 30,000 pages of information available through Micronet.

Dr Jeremy Bray, shadow spokesman for information technology, said "Micronet is a very good way for us to establish a grass-roots computer network. We can link together a great number of people who are micro buffs and who are interested in local community work."

He went on: "Micronet will help us with our election organisation and policy-orientated work. MPs will also be able to benefit from the system, both from the notice-board side and also in finding

MCN 2/18A

Work your way through the most challenging  
 track and field events. As you gain experience  
 and confidence you begin to excel in the four  
 exciting events: 100 metre sprint, 110 metre  
 hurdles, long jump and pole vault.

Here's your chance to be part of the winning  
 team. Pit yourself against the clock and beat  
 the record.

Sports Hero includes:

- ★ Multi level competition
- ★ Spectacular graphics
- ★ Smooth animation
- ★ Real time action

Can you surpass your personal best!

## Labour

From front page

out new members who may register their interest in volunteering support at their local community level?"

"We expect to have 100 users in the first few months," he continued, "building up to a large number later on. Membership costs £10 off-line and an additional £10 if you want to go on-line. Within 20 minutes of starting up our pilot scheme we had users asking for membership."

Dr Bray thinks that the Labour Party is using Micronet differently from other political parties because it is not a centrally organised project but rather relies on the active participation of the users. "We are building much more on the spontaneous enthusiasm of computer users, and we think this will be much more effective," he said.

The project is costing the Labour Party £1,000 for the first six months, and it is intended that the scheme should then become self-financing.

Dr Bray has 30 years of experiences in the computing field. "Labour has always been in the van of information technology," he said. It's all very well to talk about leading the way, but some of us invented it in the first place."

Dr Bray learnt to program on EDSAC, the first computer in Britain and he was responsible for introducing the treasury to economic modelling in the 1960s, and then in the 1970s he secured public access to modelling.

Roger Ward, who has been appointed as manager of the Micronet project, thinks Micronet will eventually replace the Party's current reliance on paper communications. He said: "Our local communications are extremely slow at present. Most local party groups only meet once a month, and if you send a circular to branch secretaries, it might not reach the members for weeks."

## BASIC

From front page

said. To quote his letter: "Some of us feel that poor programming in poor computer languages is an actual hindrance to competence in real computer usage later on."

"Computer-aided teaching seldom rises above the level of mechanistic programmed learning," he wrote. And the problem is a fundamental one — it's all down to BASIC.

Dr Jeremy Bray, MP,  
with Timothy Schoonmaker,  
Micronet managing director

Prof Fellgett explained: "BASIC belongs to the Fortran group of languages, which has never had the right approach to addressing computers. It was all wrong from the beginning. There's been a lot of commercial beef behind BASIC and so it has a very user-friendly implementation. What you really need is a language which has discipline, content and clarity, and enables you to formulate ideas correctly."

But Prof Fellgett doesn't see Prolog as the answer to all computer problems. "It's a parallel language, not one which is forging way ahead."

As well as having to re-educate young computer students and rid them of some bad habits, university lecturers come face to face with keyboard jockeys. Professor Fellgett explained this term: "It's someone who becomes quite obsessive about computers: it's like the way in which card-playing completely takes over some people. The keyboard jockey spends all his working hours at the keyboard, but what he's doing isn't productive. It's true, he does gain enormous knowledge of how the machine works but he's still only using it to play games."

Prof Fellgett recounted the shocking tale of a youngster who found his way into university premises and was playing on a computer in the evenings. Several times he was prevented from returning to use the computer, and when he finally found that he could no longer use the machine, he killed himself.

That's an extreme case of a problem which is encountered occasionally. As far as Professor Fellgett is concerned, the best attitude to computers is the down-to-earth one. "It's really only a tool, and should be

thought of like a cooker. You switch it on when you want to use it. That's how to make proper use of the possibilities open to us."

Professor Fellgett was sceptical about the "Holy Grail" attitude which is prevalent. "I think it's like the South Sea bubble and everything has been romanticised. You just have to look in the papers to see how many computer companies are folding each week. The bubble has now burst, and everything will settle down."

So take some advice from a specialist, dust off those rose-coloured spectacles and look at computers in the harsh light of day, if you want to make the most of their capabilities. And don't be disheartened if you've never had access to computers in school — you could still go to college and become a computer programmer.

## Macbeth on your micro

The classics come to computer games — now Macbeth is the star of the latest offering from Creative Sparks.

It's a graphic adventure which combines education and entertainment. Macbeth — the Computer Adventure is based on Shakespeare's original, and for the price — £14.95 — you also get a full edition of the text. You'll be at an advantage if you already know the text.

Due to be launched in early October, the adventure comes on two fast-loading cassettes. There are four independent adventures which must be completed, and psychiatrist's couch sessions which involve you in working out the aims and motivations of the leading characters.

David Gearing of Thorn EMI said: "This ingenious package breaks new ground for adventure games. Macbeth is a splendid basis, full of unexpected twists and turns, rich in different meanings and alive with fresh possibilities."

Creative Sparks, Thomson Hse,  
296 Farnborough Rd, Farnborough,  
Hants

## It's touch and go

"Now anyone can master the home computer," is the slogan being used to promote the new Touchmaster. Touchmaster seems ideal for any occasion when the keyboard is impractical or unwieldy —

graphics, teaching pre-school children, adventure and strategy games...

Touchmaster is British designed, developed and manufactured and comprises an A4-size touch sensitive pad which contains its own microprocessor and interfaces to your computer. Overlays can be placed on the screen for a variety of games and programs.

Touchmaster, the company, is owned by Prutec, which is part of the Prudential Assurance group. The product has taken nine months to develop and Touchmaster is currently negotiating with a number of software houses, including Romik and Ocean, to produce software — or rather "touchware" — before Christmas.

Touchwear will consist of the pre-recorded cassette, bundled with a printed overlay sheet and instruction booklet in a distinctive package. A broad range of 50 units of touchware is scheduled to be launched before Christmas.

Touchware will cost £9.99 and should be available from most major outlets. Touchmaster itself costs £149.99, for which price you get all accessories necessary for immediate application, plus the multipoint graphics program.

Touchmaster is aimed at the number of home computer owners who are growing dissatisfied with computer games. You can write your own programs and experiment with all the facilities now open to you. Touchmaster can interface with the Spectrum, Commodore 64, BBC, Dragon and VIC-20, and Amstrad and MSX versions are planned.

Touchmaster measures 210 x 297 mm and has a resolution of 256 x 256. You use the stylus to draw, and hey presto! You immediately see your drawing on screen.

Touchmaster, PO Box 3, Port Talbot, W Glamorgan SA13 1WH

## We are moving ahead

In the latest round of claim and counter-claim, Commodore's UK boss said his company is about to take the lead in home computer sales.

At present they were level-pegging with 34 per cent each, said general manager Howard Stanworth at the official launch of the Commodore Plus/4 and Commodore 16.

He said Commodore had

**At the touch of a pen**

been ahead for some time in value sold. But now, according to Gallup, computers sold had increased from 14 per cent at the end of 1982 to 34 per cent in the first half of this year.

The Commodore Plus/4, at £300 claimed to bridge the gap between business and home computing, has 64K of RAM and four built-in software packages: word processing, spreadsheet, file management and business graphics.

The Commodore 16, intended to replace the VIC-20, is sold in a £140 starter pack with a cassette player, BASIC tutorial and four new programs: Rolf Harris' Picture Builder, XZAP, Punchy and Starter Chess.

There are also two new printers, both at £400: the MCS 801 colour dot matrix printer and the DPS 1101 for "letter quality" output.

Mr Stanworth said he believed that the shakeout among software houses would continue, with more companies going under.

Commodore planned to use mass marketing techniques, similar to those it had used to sell hardware, to promote its software, reckoned to be a £100m market next year.

• Mr Stanworth claimed that the Commodore 64 held 60 per cent of the world market and said it would continue to be the company's No. 1 volume product.

*Commodore, 675 Ajax Ave, Slough, Berks SL1 4BG*

**Stars host launch**

Quicksilva announced its new Christmas range of games in a pre-PCW show launch which starred Anne Nightingale,

Radio One discjockey, Prince Charles and Princess Diana. Arrivals at Maxim's were greeted by the royal couple who looked in good shape despite the fact that Princess Diana had left hospital with her new son the day before. The royal look-alikes acted as master of ceremonies, although overhearing Princess Diana later, her Cockney accent was much in evidence.

Zombie Zombie, by the author of Ant Attack, is a 3D game for the Spectrum, while Strontium Dog is first in the series based on the comic 2000 AD. Blood and Guts involves the player travelling round parts of the body to recover an escape ship. Quicksilva claims that the body is represented with accuracy. Also new are Pro Darts, Battlezone, Magic Micro Mission, Castle of Jasoom and Dungeons of Ba. Ant Attack is now available for the CBM 64, while Outpost is an original arcade game for the Atari.

*Quicksilva, 13 Palmerston Rd, Southampton*

**Win with fizzy drinks**

Three complete Spectrum systems can be won in a competition being run by the National Association of Soft Drinks Manufacturers. Included in the top prizes are a 48K Spectrum, 14-inch portable colour TV and tape cassette player as well as two computer games.

There will also be three second prizes of 48K Spectrums and 48 runners-up will receive pocket electronic games. What you have to do is solve a simple anagram and complete a tie-breaker sentence. Your entry

must be accompanied by six bottle tops from large returnable soft drinks bottles.

The competition is intended to promote sales of drinks in returnable glass bottles and the prizes will be awarded on a monthly basis, in December 1984, January and March 1985. If you are not one of the prize winners, your entry is forwarded to the next draw, when you stand another chance of winning.

You can get hold of an entry form from grocers or newsagents who will be displaying a poster if participating in the competition. Entry forms should also be distributed through your letterbox.

*National Association of Soft Drinks Manufacturers, The Gatehouse, 2 Holly Rd, Twickenham TW1 4EF*

**MSX**

Activision is basing the MSX system with a range of six titles. Beamrider, Decathlon, Pitfall II, River Raid and Space Shuttle and Zenji are the initial programs, which will cost £11.99 and will of course run on any MSX machine.

*Activision, c/o Ray Hodges Assoc, 5/7 Forlease Rd, Maidenhead, Berks SL6 1RP*

**Santa arrives**

Although it may seem early days, Creative Sparks has announced its Christmas game, Special Delivery. Star character is none other than Santa himself, who must be guided across the sky, delivering his presents from the clouds.

There are four screens and seasonal music and packaging set the scene. Scheduled for release in early October, the game costs £6.95 for 48K Spectrum, £7.95 for CBM 64 (fast-loading cassette) and £8.95 for 32K Atari.

*Creative Sparks, Thompson Hse, Farnborough Rd, Farnborough, Hants*

**Teaching on screen**

Master Class has announced three additions to its range of video cassettes to be used as an aid to programming: VIC-20 Levels 1 and 2, and An Introduction to the BBC Z80 Business System.

David Redclift demonstrates programming and shows you

how to write your own programs. On each video cassette two BASIC programs are included, which can be transferred to your computer.

The video cassettes are available for VHS and Betamax and cost £19.95 each. They last about an hour.

*Master Class, Holiday Brothers, 172 Finney Lane, Heald Green, Cheadle, Cheshire SK8 3PU*

**Roland Rat's adventure**

Ocean has announced three new games which should be in the shops by mid-November, and two of the three feature Hunchback and Kong. Roland Rat will be making his micro debut with a 40-screen "mega-adventure" for Commodore and Spectrum.

Hunchback II Quasimodo's Revenge is a five-stage game, which costs £7.95 for the Commodore 64 and £6.95 for the 48K Spectrum.

Kong Strikes Back is an adventure game, with Kong on a visit to the fairground, where he rides the roller coaster. Price: £7.95 for CBM 64 and £6.95 for 48K Spectrum.

A TV advertising campaign will back these new releases over the Christmas holidays.

*Ocean, 6 Central St, Manchester M2 5NS*

**Programmer Tony Pomfret trip to**

**Blackpool Briefly**

Complete Microcomputer Services has brought out a new word game for the BBC. It's called Lingo and can be played by up to four people. Your computer deals you 12 random words each, displays a pool of terminations, and leaves you to make up sentences. You gain points for ingenuity. The rules of grammar are adhered to, but

the fun of the game is to make up unusual sentences. Lingo costs £12.95, and the first 1,000 buyers will be eligible for a free keyboard overlay. Spectrum, CBM and QL versions are planned.

*Complete Microcomputer Services, 32-38 Osnaburgh Street, London NW1 3ND*

Make your own software look professional with easily recognisable cassette inlay cards. Tape Tabs has brought out sets of cards with different designs specially for software cassettes. Each set of 10 includes pictures to suit four different groups of programs, and the inlay cards are all in full-colour with spaces for you to fill in your program details on the spine. Cost: 85p per pack.

*Tape Tabs, 70 Orbel Street, London SW11 3NY*

The first Texas Instruments owners convention will be held at the Ritz, Whitworth St West, Manchester on Saturday 3rd November. For details contact TI User group, 40 Barrhill, Patcham, Brighton BN1 8UF. Tel: 0273 503968.

The BBC School Radio series Introducing Geography has produced four computer simulations which aim to help listeners acquire a geographer's eye. The radio broadcasts set the scene and provide background information, while discs can be ordered from the BBC. The three disc set costs £20 and the order number is ISBN 0 563 3265 2. Aimed at the 10-12 year age range, the programs are claimed to combine fun with education.

*BBC, School Orders Section, 144 Bermondsey St, London SE1 3TH*

BRMB, Birmingham's local radio, is featuring a new computer show. Scheduled for broadcast at 8 pm on Mondays from 1st October, the show will be concentrating on basic knowledge of computing. Two children will be BRMB's guests on the show each week to review software, and BRMB invites any youngsters in the Birmingham area who are interested to write to the show.

*The Micro Show, BRMB Radio, PO Box 555, Birmingham 6*

Systematics International has launched a series of business accounting software for the BBC. Currently available are the sales and purchase ledger

duo and stock control and invoicing duo. Price: £89.

*Systematics International Microsystems, Cleves' Hse, Hamlet Rd, Haverhill, Suffolk*

Acornsoft is launching 20 new titles in a pre-Christmas bonanza, backed by £150,000 advertising. Elite is Acornsoft's new 3D spaceflight simulation which was launched at Thorpe Park. Acornsoft believes Elite represents the "state of the art" and expects it to become a cult game.

*Acornsoft, Betjeman Hse, 104 Hills Rd, Cambs CB2 1LQ*

3M is offering ex-stock cable assemblies for home computers. There are two versions available, both BBC-compatible: Scotchflex printer cable and disc drive cable. For details contact Penny Cartwright on 01-659 2323.

*3M, 3M Hse, PO Box 1, Bracknell, Berks RG12 1JU*

Galaxia is Kuma's latest offering for the Amstrad. Costing £5.95, it's an arcade game which incorporates multi-key scanning, enabling you to fire, thrust and move simultaneously.

*Kuma, 12 Horseshoe Park, Pangbourne RG8 7JW*

## And even more...

Here's the solution to our CDS competition: Horizontal words: Pandemonia, Zarak, Rescue, Draughts, Jackpot, Crawler, Fifth, Omega Run, Test Match, Orpheus. Diagonal words: Star Gazer Secrets. Vertical words: Derby Day, Glugg Glugg, Olympics.

Winning entries to the CRL wordsquare competition:

Andrew Talbot, Derbyshire; B Morris, Lancs; Ajay Puri, Kent; Mike Keeley, Slough; Mrs M J Budden, Somerset; Andrew Mitchell, Newmarket; Sunil C Ranmal, Leicester; J C Jennings, Herts; Andrew Butcher, W Glamorgan; A P Beattie, Bath; Mark Capstick, Croydon; Mr D J Jones, Tiptree; Mark Booker, Derbyshire; R Battams, Blackheath; John Hurst, Workington; Mark Dawson, Burnley; D Close, Winchester; Mr A G Bates, Walsall; M L Cordwell, Chelmsford; Jon Chatten, Norfolk; Jeremy Rundle, Frimley; Barry Atkinson, Darlington; Tim Prince, Kendal; Graham Grant, Aberdeenshire; Carol Whitlam, N Humbs; Mr S Brown, Warks; Steven Gay, Bristol; Christopher Hall, N Ireland; Mr A F Povey, Merseyside; Mr R Cockin, N Humbs; David J King, N Humbs; Brian Stirling, W Lothian; Miss S Mace, Bush Hill Park; Alan G Kearney, Bangor; Luke Gow, Bury St Edmunds; Stuart Head, Dorset; Neil Shipman, Rainham; Paul Kelly, Lancs; Val Abraham, Bedford; W K Cheng, Staffordshire; Peter Turton, Northants; K Chua, Birmingham; Ian Wagland, Dursley; Paul Sugarman, Nottinghamshire; Douglas Hampton, Middx; David Hughes, Gtr Manchester; K Ceaser, Rotherham; Dave Brown, Winchester; P Chatfield, Hatfield; Ian Lester, Cheshire; Les Isbister, Biggleswade; Tony Giscombe, Wores; Mr Linley, Manchester; James Garard, Bournemouth; Jacqueline Garnett, Alltam; Sean Kilvington, Cleveland; Mr H Sheen, Strathclyde; C Redshaw, Northants; Mr C Crane, Staffs; Paul R Sephton, Lancs; Douglas Hardy, Enfield; Marcus Prescott, Staffs; William Atkinson, Merseyside; R J Henthorn, Newport; Mr J H Matthews, Crawley; Miss R Scott, W Yorks; Fiona Squires, Cornwall; Mr A Ryan, Cambs; Frank Cassidy, Londonderry; Martin Ward, Long Eaton; Jason Allen, London; Deborah Gill, Basildon; Mr I West, Gtr Manchester; Keith Mawson, Slough; Mr Brian Duffin, Plymouth; Gary Davies, Oldham; Kevin Hildersley, Edinburgh; Neil Collier, Birmingham; Mary Hewitt, London SE20; Miss P Marsh, Warlingham; S P Ketteringham, N Ireland; Gordon Sutherland, Scotland; Adrian Abridge, Chelmsford; Christopher Moreton, Nuneaton; Mr T A Smith, Tyne & Wear; Girvan Burnside, Dundee; Mr D G Houghton, Mitcham; Alan B Hible, Middx; Mr T Rye, Dronfield; S Bowden, Oxford; Richard England, Milton Keynes; Edward Dicken, Notts; Simon Woods, Peterborough; Mrs S Martin, Maidstone; Brendan Fallow, Runcorn; Kulvinder Rehsi, Upton Park; Mrs P Bates, N Walsham; E G Carrington, Stevenage;

## The Unit Trust Program 48K Spectrum £12

Michael Slatford, 3 Campden Rd,  
S Croydon, Surrey CR2 7EQ

This is a 30K storage program for business people, or those who invest in unit trusts. We are welcomed and invited to ENTER a number of cards between 10 and 50 and then offered the Main Menu of: Fill in Cards; Review Investments; Update/Sell Investments; Amend Information; Analysis; Printer Option and to SAVE 'Unitrust'. A third screen gives the opportunity to delete frame.

If Option 1 — Fill in Cards — is keyed then the screen has at top right 'Card No.', then information on the trusts bought; e.g. dates, offers, etc.

To fill these in the program requires answers to 10 questions such as: Name of Company, Name of Trust, Offer Price, Amount Invested. It then works out the percentage change since last distribution, Annual percentage Change and Total Yield.

There is no sound, but a careful use of colour makes the cards restful to the eyes. The analysis options cause it to calculate quickly the performance of the investments and it will accept over £1 million!

A very useful package for an investor wishing to keep track of the family fortune. T.W.

## Frantic Fingers BBC B £3.99

Power, 12 Hagley Rd, Stourbridge, W Midlands DY8 1PS

If you have ever cursed your keyboard controls or your joystick then this utility may save your sanity!

It lets you redefine the control keys used in games and in certain cases replace them with a joystick. After loading, the program asks if you wish to change key controls or use the joystick utility. If the former, you are given a choice of eight 'Keyboard Converters'; i.e. eight keys may be redefined. When you have them, save the machine code patch routine with the Save option, and \*RUN it before loading the game you wish. The game must use the keys you have redefined.

The joystick utility is similar, you may choose the keys which the Up/Down/Left/Right/Fire functions will replace.

Each key input gives a short beep, and the utility is easy to use. I converted several of the Acornsoft Defender keys to joystick, and changed the move and fire buttons on Virgin's Microbe without any difficulty. A colour screen would have been nice, but isn't essential. Overall, a product worth buying, but mainly for the games enthusiast.

D.A.

## Panorama (H) Commodore 64 (Cassette £17.95 Disc £19.95)

Talent Computer Systems,  
Curran Bldg, 101 St James Rd,  
Glasgow G4 0NS

This program gives you an environment within which you can manipulate the hi-resolution graphics to produce complex pictures. I understand that a medium-resolution package using multicolour mode is also in the pipeline.

The package is of such complexity, that I can only briefly run through it's capabilities.

The package is menu driven and provides routines for the drawing of lines, points, circles, ellipses, and the use of rubber banding. There is a range of commands for the moving and manipulation of areas of the graphics screen. The concept of filling areas has been extended to include the use of user defined textures so drawing a brick wall trivial.

Two styles of drawing cursor are provided, both controlled by joystick or cursor keys. If the detail of your sketch is difficult to see, a magnification mode can zoom in on an area. Once your masterpiece is complete, you can save it on disc or tape. Full instructions are given to enable you to use the pictures in your own programs.

Overall a highly professional product which is both simple to use and extremely versatile. A.W.

# Business and pleasure

A selection of utilities which  
take you from the stock  
market to the pages of your  
address book

## Plus 80 Address Manager 48K Spectrum £19.95

Oxford Computer Publishing, 4  
High St, Chalfont St Peter, Bucks  
SL9 9QB

Address Manager is a name and address filing program for use with an 80 column printer. It will not work with the ZX printer, so you'll need a Centronics or RS232 interface and a printer to make use of it. It doesn't matter which interface you use, as the program includes a printer formatting routine.

The instructions are not clear; when you load the program, they say you will enter the main menu. Actually, you enter the printer formatter, and enter details about your interface and

printer. This is not for the novice, as you must understand enough about your printer to instruct the program on what data codes to send. When you exit this routine, you must save the Address Manager on tape or microdrive cartridge, before obtaining the main menu.

The feature offered are standard; insert, locate, amend, delete, select, display, print, and maintain file. Using the cursor rather than ENTER to terminate a line is a non-standard feature and frustrating.

Replacing an address book with a home computer is a dubious application, since you could buy several books for the price. D.N.

## Screen Machine 48K Spectrum £8.25

Print 'n' Plotter, 19 Borough  
High St, London SE1 9SE

Don't confuse this with ISP's program of the same name. Do you want lots of screens in your programs but haven't enough memory? Help is now at hand.

Part 1 takes previously designed screens and compresses them from the normal 6912 bytes to 3596. In black and white only, they can compress to 2828 bytes. You may extract part screens (top, middle or bottom), compressing from 2585 bytes down to 961. The number of screens processed into a multiple file is limited only by memory and can be saved and loaded into your program at any location.

With Part 2, you can move parts of your screen about, change colours, enlarge or reduce part or all, flip the screen into mirror image, and blend or superimpose different screens.

Part 3 allows you to set up 48 text strings and compress them, saving almost 50 per cent, and locatable anywhere in memory with instant recall. Microdrive adaptation instructions are included.

I discovered a rare bug, now corrected. Anyone getting crashes on relocation should contact Print 'n' Plotter for update. Hobbit-style adventurers and graphic programmers will find Screen Machine a boon.

# A NEW TYPE OF ADVENTURE GAME

Hampstead is an adventure game for would-be social climbers. Speed of reaction isn't so important. What matters is your ability to solve complex problems, which get harder the further you proceed in the game. Hampstead is a quest, but not for gold. The aim of it is to reach the pinnacle of social status, and acquiring wealth is only one part of the problem. If you wish to go up in the world you also have to gain the admiration and respect of your fellow men, and there's more to that than a fat bank balance.

In Hampstead it helps to know something about art — or rather, to give the impression you do. You must wear the right clothes, be seen in the right places, live in the right house with the right partner and use the correct mode of transport.

At the start of the game you are a nobody whose aim is to become a somebody. So lie, cheat, steal and defraud. You know it makes sense.

#### Questions People Ask About Hampstead:

- Q:** Is there life after Hampstead?  
**A:** No, Only before and during.
- Q:** Why do dustbins have no lids in Hampstead?  
**A:** In order that passers-by may see the week's completed Guardian crosswords stacked neatly within.

Hampstead — a new type of adventure game!

Melbourne House

## ATARI PROGRAM

Here's a simple, fun game by Joel Goodwin which you'll find infuriating. You'll spend hours trying to beat it, so be warned: it's addictive

# A-maze-ing!

Here's a simple game for you. You start in the bottom right hand corner of the spiral maze. All you have to do is travel round the maze until you reach the centre, touching the cross in the middle.

Sounds child's play, doesn't it? Well, it's not. Positioned in the top left hand corner is an evil spirit, and it's out to get you. The spirit isn't restricted by physical barriers, like the walls of the maze. It homes in on you as if it had a radar, and heads straight for you.

If you let the evil spirit touch you, you lose one of your three lives. If you're successful and touch the cross, you're transported to a higher level.

There are three levels. Wherever you go, so does the spirit, and as you move up a level the spirit moves faster.

This game runs in antic mode

4, which has a four colour character set, providing you with interesting results. Take special note of the REMs indicating where inverse characters are used

### How it works

5-10 set up program  
150-155 set up new game or level  
160-250 main routine  
5000-5300 set up antic mode 4, display list and colours  
6000-8200 maze  
8210-8244 win routine  
8250-8285 redefine characters  
                  load display list  
                  interrupt  
8295-8310 level increase  
8315-8330 lose life, end game  
8335-8360 sound when caught  
8500-8510 print M\$ subroutine  
8550-8630 animation between levels

### Variables

LEV level number  
LIVES men left  
X,Y position of man  
GX,GY position of spirit  
RPNT reprint character over which the spirit is  
S joystick movement  
DL display list pointer  
X1,Y1 last position of man  
GX1,GY1 last position of man  
LV,K,GST control speed of spirit  
LC locate and hold value of screen, PEEK for spirit and man

### Hints on conversion

CHRS(125) clear screen  
POSITION position cursor to X,Y co-ordinates  
T top left screen memory address  
STRIG (0) read joystick button  
PEEK (632) read input from joystick port 1  
SFT COLOUR 4,1,0 set background colour  
SET COLOUR 2,G,6 set text window co-ord  
SET COLOUR 1,0,10 set character luminescence for text window

• Remember that on the Atari, characters in *italic* should be entered in inverse.

## Moonsweeper 48K Spectrum £11.95

CheetahSoft, 24 Ray St, London EC1

Am I at home or at the Silver Dollar on an arcade machine? Moonsweeper left me breathless with its brilliant graphics, sound, fast action and addictability.

Loading takes one minute 45 seconds and gives an introductory screen of a waving spaceman with you reflected in his helmet. Your task is to find stranded lunar pioneers on four moons, guarded by hostile Base Carriers, Short Range Interceptors and Death Towers.

First you must avoid the meteors — exploding them raises your score — and land on a coloured moon. You skim along the surface — shown by radar lines coming towards you —

destroy hostile forces and pick up six pioneers. Then you must zoom through the lines to gather speed for take-off to the next moon.

There are four levels of difficulty and options for one or two players, sound on/off and reset game. The program is compatible with Cheetah RAT, Kempston and Interface 2 joysticks. 'Up' increases the speed over the moon and 'Down' activates defence shield in space, slows down speed over moon or allows firing above moon level.

Cheetah has a winner! T.W.

## Elite 32K BBC £17.95 (disc)

Acornsoft, 104 Hills Rd, Cambridge

Trying to review this program in the space available here is like trying to get a gallon in a pint pot! This program has been hailed as a megagame and it certainly tries to live up to that title.

The program isn't the whole package; the box fairly bursts open, to reveal a 64-page instruction manual, a 48-page 'novella', a quick reference card, wall chart, function key strip, loading instructions and competition entry card. Try copying that little lot!

The game is a superb three-dimensional graphic trading game rather like Traveller. It's a

role playing game. To try to describe it here is madness, you aim to survive and make a profit as you wander the planets with your cargoes.

There are nasties to do battle with, 22 different types of craft, and you even have to buy your own computers, when you can afford them.

The game is difficult and even when you are used to it, a single game could last weeks — thank goodness for the save game facility. Addictive? This game could wreck relationships of every kind, beware! D.C.

## Galaxia Amstrad £12.95

Kuma, Unit 12, Horseshoe Park, Horseshoe Rd, Pangbourne, Berks

What a pity there is no joystick option in this otherwise well written program where all user inputs are via the C, E, L and + keys.

With ten screens of nasties, all of which will both amuse and amaze you, your task is to steer a space ship through the atmosphere of some distant galaxy. Armed with an unusual multicoloured instrument, looking for all the world like an Inter-Galactic Thermic lance, you must destroy the hordes of aliens. Each hit scores points on an incrementing scale, depending upon how far into the game you have survived. There are three levels of play from which to choose.

The well-designed top ten score board and the ability to 'hold' the action at any moment, are both desirable ingredients in such an addictive game.

The concept is not original but the format of this high speed arcade game, with superb colour graphics and an extensive use of the Amstrad's powerful sound facilities, allied to the ability to fire-on-the-run, make it a game apart from all others. Highly recommended. D.H.

# Galaxy of stars

New releases with a theme that's out of this world — the ever popular space games

## Space Ace 2101 CBM 64 £7.95

Ozi Soft, London Hse, Baulhurst, Hants

The best description for this game might be a mixture of Star Trek and Defender. However, the quality isn't up to either of them.

There are two playing modes available. In one mode you have a defender's view of a landscape. Various aliens come towards you and they must be shot. While doing this you should keep your fuel levels quite high. If you run out of fuel your destruction is imminent.

The other playing mode has a view into space. You may move your sight around, line up the enemy and shoot. A map shows the positions and bearings of you and the various planets in the solar system.

A computer status report will give you the current stardate, food supply, virus immunity time, temperature, pressure, etc.

This game looks and sounds fairly good but lacks lasting interest. I found that it got very repetitive after only a few minutes. The graphics and sound are not all that outstanding — not of the normal quality found on CBM 64 games. K.I.

value for money	55%

## The Power Jhen Microsoft £6.95

Program Power, Sheepscar Hse, Leeds LS7 1AD

The setting of this game is somewhat depressing. Poor Jack is doomed to work in a large space garage collecting fuel pods for the customers.

The game is great fun, though, as you control Jack using his rocket powered back pack to manoeuvre him from platform to platform. There are problems in the form of the 'space googlies' who keep trying to stop him. Another difficulty is his oxygen supply which will only last one minute per trip. These make the game difficult but more exciting.

This game was originally released on the BBC machine and thus is a conversion with some radical changes. Firstly, the 16 colours of the BBC version have been reduced to four in this. This makes the graphics less interesting but does make the game faster, so fast that it is even more of a challenge than the original.

Secondly some of the graphic characters are different but just as interesting. The levels, with five different screens, are excellent and progress from the difficult to the utterly impossible.

A good game which has lost colour but not excitement. D.C.

 2610-2710 end screen, final score

Take a break from violent games and give yourself a rest

This game requires manoeuvrability. Crazy Kidd is our hero and what you have to do is move gold from his cave to the bank. He's finally realised that it pays to save — and also keeps itchy fingers away from his hoards of treasure

However, poor Crazy is clumsy and not too co-ordinated. He has problems with walls — that is, he walks into them. He's also been known to fall down ladders. You must guide him and try to shield him from these pitfalls

If a disaster occurs and he finds himself in a crumpled heap at the bottom of a ladder, or with a buckled nose from head-on contact with a concrete wall, you lose vital points.

Use the arrow keys to move. Watch out for the biggest hazard of all: dramatic subsidence in the cave, in which case you'll have to get the pickaxe to dig out all the rubble.

**Variables**

x, y character movement  
 sc score  
 P, Q cave collapse  
 d, t print position  
 T number of gold blocks

**Shopper**  
**VIC-20 + 16K**  
**£1.55**

Mastertronic, 42 Welbeck St, London W1M 7HF

On loading you are presented with a nice title page which, on completion, switches to a second screen. At this point you notice a feature of the game... a rapid flickering which could be nasty if you had any tendency to migraine

With screen 1 you have to cross two roads in the style of Frogger. On the way you must collect coins and avoid an aggressive woman who patrols the central reservation

On reaching the other side of the road, assuming you have collected all the coins, you pass on to the next screen

The next two screens are very similar to the first and involve

roads and railway tracks. Again you must collect coins and avoid the women

Screen 4 involves taking a trolley around a supermarket and collecting fruit and things. The ubiquitous women chase after you again

Since I didn't progress beyond screen 4 and I had no instructions I can reveal no more

Graphically the game is above average but the animation and movement were jerky and, particularly on screen 1, flickery. But at £1.99 I couldn't moan too much

**Mr Mephisto**  
**Commodore 64**  
**£6.95**

Euro-Byte, Churchmill House, Ockford Rd, Godalming GU7 1QY

The setting of this game is a Hades type underworld full of devils and nasties. The object of the game is to work your way through various screen settings, gaining points as you go

There are three skill levels and four speeds of play

The cassette tape loads using a fast load system called Overdrive

The first screen displays an escalator moving downwards which you have to run up to reach a top level. If you fall off the escalator, you fall into

flames, and you lose all your lives

While you're getting up the escalator you have to avoid devils coming down. If you get to the top you need to grab a halo to get through the door and into the next screen

However you need to time your movements carefully as there is another devil on this level who emerges out of the ground

I found the game somewhat difficult but it held a certain fascination that kept me trying to beat the little devils. All in all a good game, for which a joystick is required.

**Hi Bouncer!**  
**32K BBC £6.95**

H & H, Mirrorsoft, Holborn Circus, London EC1P 1DQ

A brilliant, addictive arcade game for all Mr Men fans that shows how the 32K BBC should be used. Doubtless 'NightSite 2' fanatics will find it beneath them — but for the rest of us this is a colourful, noisy, enjoyable game

Four main screens, each having eight versions increasing in difficulty, allow us to take Mr Bounce around the town to help Mr Tall get his scarf and gloves; Mr Lazy finish his home; Mr Bump knock down his fruit; and to prevent Mr Snow from melting

The game has two versions. One is for speed freaks — the arcade version — and the practice program

Response to the keyboard is instantaneous, but it is a shame that the concise insert instructions have 'full stop' for 'Jump' when they meant 'up'. Screen top tells you score, lives left and bonus, while the level on is displayed bottom right

As you assist Mr Bounce don't allow him to touch other Mr Men — who increase in numbers with the degree of difficulty — or other obstructions, otherwise he ricochets around the screen with a zooming sound!

It has nicely animated graphics, good use of sound and colour and clear child-like drawings of houses. A humorous pleasing game.

# Adventure on your micro

More reviews telling you exactly what you can expect for your money

**Laser Reflex**  
**32K BBC £7.95**

Talent Computer Systems, 101 St James Rd, Glasgow G4 0NS

I have to admit that I expected a lot from this game after reading the cassette sleeve and other information about it. The aim is to dispel the ever increasing hordes of aliens with your laser cannon, but wait, the catch is that the laser can only be fired against a concave mirror

The blurb also promised a screen designed by a 'talented artist' and unfortunately I was disappointed on both accounts

I think that the screen was the main problem, being in a four-colour mode the artist has used complex pixel graphics and there are a great number of shading effects used. So much so that I found the whole thing to be a complete muddle

The game itself is not as interesting as I thought either. The mirror is of a fixed position and shape and you aim by moving the laser. The aliens look rather fly-like in some cases and even the writing on the score board is difficult to read

The change of level affects the speed of the invaders but there are no real bonus screens I'm afraid.

**Tornado Low Level**  
**48K Spectrum £5.95**

Vortex, 280 Brooklands Rd, Manchester M23 9HD

According to the advertising blurb, this game is supposed to give me hypermania. Well, not quite, but it does have the closest thing to Zaxxon style graphics I have seen on the Spectrum!

They may not be the finest yet, as also claimed in the advertising but they are pretty good

You fly the tornado plane over 40 screens of landscape, including houses, trees, telegraph poles and seascape, and search for enemy bases.

To destroy these you must fly as low as possible over them, but do not crash into anything! Also keep an eye on your fuel; you will have to land to fill the tanks

The game is shown in perspective 3D, i.e. a birds eye view, and you can see your plane, and its shadow, underneath. Colour is well used

Sound, however, is sparse, and whatever the whirring sound is, it aggravates me intensely. The game also lacks any real point

Flying over little crosses is not rivetingly exciting! Still, its pretty to look at, impressive, and maybe worth the price.

**U.S. SCENE**

# Take the guesswork OUT OF buying

If you're tired of guessing when it comes to making hardware and software purchasing decisions, you might be interested in three new books recently released from Byte Books. The first, *Microcomputer Buyer's Guide* is a 384-page guide covering over 600 micro systems made by over 200 manufacturers. It is quite up to date, and features many of the latest small computers and portables. The book discusses new technologies, contrasts the new Japanese machines to existing U.S. products, and contains charts which compare features to performance. The book also includes reviews of manufacturer's software, pricing, a full glossary, and other features.

The second book is called *Terminals and Printers Buyer's Guide*. It deals, on a model by model basis, with over 500 units, including those used for graphics as well as text. The book also includes information on data communication products, interfaces, protocols and standards, information on various companies, a glossary of terms, and pricing. It is 320 pages long.

The third book is called *Microcomputer Software Buyer's Guide* and is 352 pages long. This book contains in-depth reviews of best-selling applications programmes in the following areas: word processing, financial analysis, communications, data base management, and integrated packages. The book is well illustrated and contains information on the various manufacturers and a complete glossary.

Each of the three books carries a suggested list price of \$19.95 and is available through your local book seller or directly from Steve Mathews, Suite 2677, Byte Books/McGraw-Hill Book Company, 1221 Avenue of the Americas, New York, New York 10020. The guides are excellent, and well worth your investigation.

I don't know how much it will cost, but you can just about bet your booties that Commodore will be out with a 32 bit machine in the not too distant future. I wouldn't say it will be out by December, but I will be surprised if it is not out by the middle of the first quarter of 1985. Why do I think this? Simple Commodore recently bought Amiga Corp. of Santa Clara, California (in Silicon Valley). Amiga has a computer on the drawing board which uses the Motorola 6800 processor, the same one used in Apple's Macintosh. However, the Amiga machine employs three custom chips which give the unit the graphics ability to display 80 columns of text on the screen of a regular television with satisfactory clarity.

Fairly recently, before the Amiga purchase was announced, Commodore's president announced that the firm would soon be debuting a machine with the power of the Macintosh for under \$1000. This is a virtual description of the Amiga.

Jack Tramiel, who recently left Commodore to take over Atari, is also rumoured to be working on a machine with similar capabilities and price. As yet there have been no other confirmed announcements from Commodore as to the date of introduction, the exact features, what other computers the new unit might be compatible with, the price, or how the unit is to be marketed. Based, however, on knowledge of how Commodore has worked in the past, it is likely that the machine will be mass-marketed, low in cost, high in features, debuted as soon as possible, and give its competitors nightmares. We'll all be watching what happens. And of course, I'll keep you posted.

Until next week...

Bud Izen, Fairfield, California

# play school on your Micro...

For ORIC I and ATMOS.

PICTURE BOOK £4.95  
ORIC I

A colourful game that makes spelling fun. Even very young children can use the computer to create exciting pictures. As they type in words the objects appear on the screen 'by magic'.

**Orc Archer**  
**48K Spectrum £7.95**

Creative Sparks, Thompson Hse, 296 Farnborough Rd, Farnborough, Hants

The Knight paces the Castle parapet which he must defend to the death. In the east and west turrets, hidden serfs feverishly boil oil and stack the rocks and swords. Below, evil Orcs gather. The dreaded F5 signal is given and they begin to climb siege ladders.

Our Knight rushes east for a rock, aims and drops, rushes west for the next. Suddenly, the first Orc is at parapet level and the rock supply dries up. You must fight with a sword only until the ladders are cleared. While all the time, Orc archers fire crossbolts.

Injuries stun the knight for precious seconds — watch out

for decapitation. The ladders are cleared, the rocks are back and the oil is ready. One oil drop and all the Orcs go up in flames.

There is a brief pause for a body count and then more Orcs arrive, or the Sorcerer, or Stone Warts, or Demon Trolls... action is fast, furious and exhausting.

The graphics are excellent and very satisfying sound. I can't write more — the Orcs are attacking. **D.C.**

instructions	90%

graphics	95%
value for money	90%

**Orc slayer**  
**48K Spectrum**  
**£5.50**

Gamma, 12 Milverton Rd, London NW6 7AS

You must find the Magic Runesword and seek and destroy Thorg, leader of the Death Moon Tribe of Orcs.

The title screen disappeared after two seconds display, leaving a blank screen while the main program loaded. Not a good start.

The essence of text adventure programming is providing problems players must solve before continuing. Within two hours, having mapped 92 of the 120 locations without more than a handful of problems, all old favourites, I quit — scoring 36 per cent. Perhaps all problems are in the last 28 locations or the score mechanics are faulty.

There are lots of bugs, wrong exits displayed, responses intended for another pass through the same location appear on the original pass and, occasionally, your legitimate exit is refused, leaving no option but to quit. Spelling howlers abound. Interesting items in descriptions are cosmetic, since the acceptable Examine fails to work. Hearing sudden screams or someone talking, Orcs running past or "you cough", also seem to be without meaning or effect.

This game is poorly written, totally boring, untested and commercially unacceptable. New boys Gamma must try harder.

**Lone Wolf 2 —**  
**Fire on the**  
**Water**  
**48K Spectrum**  
**£8.95**

Five Ways & Hutchinson Computer Publishing Ltd, 17-21 Conway St, London

This is a user friendly, role-play adventure set in medieval times, based on Dever and Chalk's Lone Wolf books. Screen edge looks like parchment displaying one of many locations in a half screen, instantly drawn, hi-res picture with a new style type giving information below and a wolf's head displaying book location numbers.

You, the sole surviving Kai Lord, having reached the King in Lone Wolf 1 with news of the destruction of the Kai by the Darklords, are ordered to retrieve the Sommersword.

First screen has you in the castle courtyard to fight an instructor developing your combat skill. Pressing keys makes your screen representation fight — the adventure starting when you lose.

Music precedes each fight — the winning of which increases your combat skill, while endurance recovers slowly unless a meal is eaten.

Darklords, flying on Kraans, hinder your attempts to find the sword. Options are displayed by keying 1, while 9 chooses them — no words needed! Gold crowns and backpack items are collected as the game proceeds — though my trial version always topped at Wreck Point.

From every point a fascinating, well-designed game. **T.W.**

# Thrilling and chilling

A whole page of adventures for you to savour

**Frog Face**

**48K Spectrum**  
**£3.95**

Positive Image, 129 Dumbarton Rd, Glasgow

This is the first commercial product that I have seen, spawned by Quill (the utility programme which produces machine code adventures to your own specification).

The plot for this adventure game is as old as time. You have been turned into a frog by Meegan the witch and must locate a magic potion to restore normality.

Initially, I died a few times. I insulted the Queen and was thrown from the battlements — I thought she might like flowers. Then I died of thirst in the desert etc. However, resurrection was swift and having made some good progress, was caught in the

catacombs.

Although a fairly competent rendering with some charm, I felt that this adventure lacked that spark of originality which sets some programs apart. The graphic screens for the various locations did not make the best use of hi-resolution and no use was made of sound.

I enjoy solving adventure games and found this one sufficiently challenging to get me back to the keyboard. The broad appeal of the plot should make it good entertainment for every one. **M.B.**

value for money	90%

**Lone Wolf 1 —**  
**Flight from**  
**the Dark**  
**48K Spectrum**  
**£8.95**

Five Ways & Hutchinson Computer Publishing, 17-21 Conway St, London

The instructions are simple and easily understood, the use of colour is imaginative and complements the detailed graphics, while the use of sound does not interfere with the progression through the adventure.

The character set has been redesigned in keeping with the medieval atmosphere and a wolf's head at screen right informs of the book location.

You are in the Kai monastery learning to become a Warrior Lord when the Darklords destroy everyone. You set off to the capital to warn the King — a dangerous mission, for the Darklords are cruel, giving no mercy.

The game starts with you acquiring combat skills in unarmed combat prior to setting off. Endurance is shown screen right and disappears during a fight. Options are keyed by 1 and acceptance by 9, other keys cause movement and so on. The locations are instantly drawn hi-res pictures with tolerable animation.

Combat skill can be increased by winning fights and gold crowns and backpack items are collected during the adventure.

Lone Wolf is also available with a book and overlay for £8.95.

# Show me the way to go home

You're lost in the jungle. Use your head to get yourself back to base — but don't hang about or all kinds of creepy crawlies will eat you for dinner! By HCW regular, Steve Lucas

You're in the tropics on an expedition and you are lost. You must find your way back to the campsite where your friends are anxiously awaiting you.

The normal tropical hazards will beset you — such as crocodiles and other unsavoury beasts. What you have to do is find your way back by entering two word commands, such as "light lamp". Use your initiative to get you out of this one!

To move around, use N, S, E, W. Words understood included:

look, examine, inventory, score, leave, drop, grab, kill, take, get, build, make, swim, pray, help, say, talk, throw, dig, wait, chop, fell, jump, climb, cut, open, read, unlock, down, go, in, out, up, eat, drink, row, sail.

Most of the fun of an adventure game comes from solving the problems yourself. Only read these tips if you are desperate.

1 You can cut your way through thick undergrowth if you have a sharp knife. Try this twice; you might be able to find two ways.

2 The plank will be useful if you want to avoid falling into the pit.

3 You should be able to chop some logs to build a raft if you can find a thicket with plenty of trees and a strong axe.

4 If you can find the key you should be able to unlock the door to the laboratory.

5 Watch out for the crocodile. You can't kill it with your bare hands.

6 You can swim across the river in one place only. There are many whirlpools and you will need a raft to cross.

## How It works

10-60 int base variables  
60-520 main control loop  
210-260 describe location/  
directions  
280-320 describe objects  
330-340 input action  
350-520 call appropriate sub-  
routine  
530 win game  
690-750 data for game  
950-2140 subroutine for actions

## Variables

p location  
\*\*\*\*\* flags  
a\$,b\$,c\$,t\$ input string and  
substrings  
s(x,y) holds string  
pp,e,f check whether item is  
present  
r number of object  
b(x) pointer to object's location  
q\$(x) locations  
g\$(x) objects  
n\$(x) words understood  
x,y,h,d general variables

## Hints on conversion

The main difficulty you will encounter when converting this program to run on other machines is in the string manipulation. A\$(1 to 4) is equivalent to LET A\$=LEFT\$(a\$,4), while a\$(3 to 8) is equivalent to MID\$(a\$,3,6).

PEN and INK are used to choose foreground and background colours.

The main control loop could be replaced by a REPEAT UNTIL loop or a WHILE WEND loop if available.

Otherwise, conversion should be fairly straightforward.

## WARNING NOTICE

Advertisements placed in this magazine are to be in strict compliance with our standard conditions (copies of which conditions are available on request) and on the clear understanding that the advertiser warrants that his advertisement(s) does not infringe any copyright or condition of sale of any interested party in the advertised product.

Further, the advertiser indemnifies the proprietors of this magazine in respect of costs, damages, or any other claims brought against them as a result of legal action arising from the publication of the advertisement.

Any breach of these terms or the said conditions may result in prosecution of the advertiser by the proprietors.

### Situations Vacant

#### ATTENTION ALL PROGRAMMERS

Sabre Software requires machine code programs for all makes of home micro. £100-200% of quality paid for quality programs.  
Sabre Software Mr Charlton, 5 Buller Road, Thornton Heath, Surrey

### TRANSIT CASES

For BBC - £26.00 VIC - £30.00  
Custom made to hold keyboard, tape unit or disc drive and accessories. Leaflet from  
INSTANT Micro Aids, FREE POST  
Send: C/O G. & H. 118 Old St. E.C.1

### ACCESSORIES

## WD Software

### QL Utilities (£10 on Microdrive)

This package offers single key loading, running or deletion of files, multiple formatting of cartridges, and auto backup of files from one or more cartridges to another with optional over-writing of namesakes. In addition a directory of 60+ files can be viewed without screen overflow. NB a VERIFY program is unnecessary - QLXOS does this automatically. Now includes directory print out and option to print any or all files on a cartridge with optional dated files. Owners of the earlier package can update by sending QL R cartridge and 25p.

### Current Spectrum Software Tradewind (£5 Cassette)

Buy a ship, provisions and cargoes to trade between the harbours of the Coral Islands. Make a fortune if the weather and pirates let you live long enough to master seamanship and economics. A strategy adventure game with graphics for 48k.

### Jersey Quest (£5 Cassette)

Following an accident, you are stranded in the labyrinth of time and must find your own way back to the Present with the aid of persons and objects from Jersey Folklore. Meet the Black Horse of St Owen, the Dragon and knight of La Hougue Bie, the Black Cat of Carrefour a Cendre, the Witches of Rocqueburg and many others. A text-only adventure for 48K in machine code (Quik).

### Morse Tutor (£4 Cassette)

This one has it all! 4-19 words/minute, variable spacing, variable number of groups of random letters, numbers or mixed, random sentences, own message, single characters (including punctuation), variable pitch. FEEDBACK via screen, printer or SPEECH (phonetic alphabet via Currah u-Speech on 48k version only), and repeat facility. Takes you to and beyond RYA and Amateur Radio receiving standards. 16K and 48K versions on one cassette, 48K only on Microdrive cartridge.

### Spectrum Programs on Microdrive

All the above are available on Microdrive cartridges at a price of £4.50 for one cartridge + the price of each program as shown above e.g. a cartridge with Tradewind and Morse Tutor would be £13.50. As a bonus, Gavin Monk's Indexed Loader is included FREE with each cartridge.

available from  
**WD Software (H), Hilltop, St Mary, Jersey, C.I.**

### AUCTIONS

## MICRO COMPUTER AUCTIONS

REGULAR MONTHLY AUCTIONS FOR ALL  
MICRO HARD & SOFTWARE.

display (MAIL ORDER ONLY)

For large catalogue, please send a  
large S.A.E. to:

**STAINLESS SOFTWARE, 18 Alstone Rd,  
Stockport, Cheshire SK4 5AJ**

### Software Applications

### Pools Riches

The Barneberry Pools Forecasting Method is an extensive pools program  
which is now being offered at the rock bottom price of £20 down and a further  
£55 only if you win at least £2000 in the first 20 weeks of using this method. Its  
author J. T. Barneberry who formerly would not divulge his lifelong secret has  
now decided that it is time others should benefit from his method, as he has  
over his long career as a highly successful pools forecaster. Remember Mr.  
Barneberry guarantees that if you don't win as above within the first 20 weeks  
then you are under no obligation to send the remainder due. Fill in the  
application form and send it off now as there are only a limited amount of  
copies available.

----- cut along dotted line -----

Please tick as appropriate:—

1. Sinclair ZX Spectrum Name .....
2. Commodore 64 Address .....

## 'Calling all whizz kids – my CLEVER CLOGS games are the ultimate challenge!'

These exciting games of skill and chance are the combined work of real life 'Clever Clogs' and their teachers to give you whizz kids the ultimate challenge in computer games that really make learning fun.

Exciting graphics, a wide choice of 'difficulty' levels, plus supplementary knowledge packs for several games in the range make Clever Clogs Britain's best buy in early learning software.

Starting with 'Party Time' for Age 3+, the Clever Clogs range brings a new approach to learning for whizz kids of all ages. And if you join the Clever Clogs Club you'll automatically be eligible for many money-saving special offers.

Selected titles available at W H Smith, Menzies and other leading retailers.

### CLEVER CLOGS early learning games

Teach adventurous Sam roadsense and guide him safely home.

Spectrum £7.95, BBC and Commodore 64 £8.95, Supplementary Knowledge Packs £5.95.

WIN **£25,000** AND SAVE THE WORLD

# Eureka!

**250 K OF PURE MYSTERY  
BY IAN LIVINGSTONE**

- 5 complete Adventures, each with its own Arcade. In one multi-load me ga-program, "Eureka!" is the ultimate computer Epic.
- Epic in scale: "Eureka!" spans five eras of history! You battle against the dinosaurs, outwit Nero and his gladiators, join the Knights of the Round Table, escape from Colditz, and finally in 1984 defeat the evil master of the Caribbean who is holding the world to ransom.
- Epic in sheer size — there's more than 250K for you to get yourself killed in.

**5 PROGRAMS IN ONE**

- All 5 Adventures are linked — but you can choose to play them separately. And they all have REAL TIME built in. So if you don't think fast, you wind up as a pterodactyl's lunch, die of over-exertion in a Roman orgy, or just lose your mind...
- "Eureka!" is not just an Epic — not just an Adventure. At the start of each historical era, you face an Arcade Action test, to decide your strength level for the Adventure to come.
- The better your score, the stronger and faster you'll be.
- And it'll keep you on your toes, with constantly-changing, static and moving graphics. Brilliant music and sound effects add to the excitement.
- As part of the "Eureka!" pack, you receive a full-colour illustrated booklet, containing cryptic riddles and mysterious illustrations. Using booklet and screen together, you steadily unravel the clues and build up a secret phone number piece by piece.
- If you're first to ring it, you save the world and collect the £25,000!
- Quite a package! And to give everyone a fair chance, "Eureka!" will be released simultaneously worldwide on October 31st, 1984. No packs will be available until that date. All orders received by mail or phone by 26th OCTOBER will be despatched by post on the 31st right across the world. So order now, and be one of the first off the mark.

Spectrum 48K or Commodore 64 (TurboLoad)

Full-colour booklet, packed with cryptic clues to help you unravel the mystery — and win the £25,000 reward

Music and sound effects built in

High quality, full-colour, static and moving graphics

Just clip the coupon. Or, for even faster action, order by Credit Card on the "Eureka!" Telephone Hotline 01-460 6000.

# Eureka!

THEN THE RACE IS ON!!!

**DEvised BY IAN LIVINGSTONE**

The storylines for "Eureka!" are by Ian Livingstone, whose "Fighting Fantasy" books have sold over 2,000,000 copies. He's dreamed up some rather nasty tricks and twists for you in this Epic, because he has also devised the cryptic clues and conundrums in the booklet that goes with the program. He's the one who knows the answers.

"Eureka!" was programmed by Andromeda teams led by Hungarians Donát Kiss and András Császár. It took the equivalent of 5 YEARS to create, and the skills of 4 graphic artists, 2 musicians and a professor of logic too. We told them to stretch the hardware's capabilities, and make sure you were kept awake for hours!! They've done it...

**£7 BONUS**

When you order "EUREKA!" before 26 OCTOBER 1984, you receive an additional bonus, £7 voucher off the price of the TROJAN LIGHT PEN from PSL MARKETING. Normal price is £12.25. You buy it for just £10.25.

Send your order now to:

"Eureka!", FREEPOST, Dept 400, Mount Farm, Milton Keynes, MK1 1HQ

**NO STAMP NEEDED**

To: "Eureka!", FREEPOST, Dept 400, Mount Farm, Milton Keynes, MK1 1HQ  
Please send me "Eureka!" packs, complete with cassette, full-colour booklet, instructions and rules, at £14.95 each PLUS 50p post & packing. If my order is received before 26 October 1984, I will receive a free £7 voucher towards a Trojan light pen. Please allow 14 days delivery for orders received after 26 October.
